AccuShoot CFX — Custom Fire Experience

Easily Design Your Own Scenarios, Basic and Advanced Drills

CFX from AccuShoot lets instructors, training organizations, police agencies, and military units create their own drills and scenarios, sequence them into complete training programs, and deploy directly to the LFX family of products. Everything built on a single, easy-to use platform.

SCENARIOS DRILLS SEQUENTIAL MANAGER

Four Powerful Components

1. Video-Based Scenarios

Turn real-world video into interactive training. AccuShoot tracks every person independently and assigns operator positions, movements, and adjusts them dynamically — saving hours make split-second decisions in realistic, evolving encounters.

2. Custom Drills

Build drills from your own videos — large or small — and configure them with precise timing, speed, transitions and scoring. Preview instantly to ensure exactly as designed.

3. Sequential Drills

Combine multiple drills into full-length training sessions, perfect for progressive skill development programs, or multi-phase training sequences.

4. CFX Manager

Your system-level command center. Add units, assign them to scenarios or drills, and monitor live performance. Automate — to ensure consistent operations and all participants receive the same quality of instruction.

Key Capabilities

- **AI Detection & Tracking**
  Frame-by-frame accuracy in every scenario
- **Visual Drill Builder**
  Drag, drop, and preview target layouts and movement
- **Custom Targets & Themes**
  Match drills to any training objective
- **One-Click Deployment**
  Push drills and sequences directly to LFX instantly
- **Dynamic Role Assignment**
  Create realistic, evolving threats and interactions
- **Multiple Scoring Modes**
  Accuracy or speed-based scoring with configurable penalties
- **Mask Editing Tools**
  Pixel-level precision for perfect hit detection
- **Full Access Anywhere**
  Use CFX from any web-based browser or touchscreen device
