AccuShoot YFX — Yonder Fire Experience

Long-Range Dynamic Shooting Training

The world’s first long-range dynamic target system

AccuShoot YFX extends the LFX platform to bring **moving targets, real-time shot telemetry, and instructor monitoring** to long-distance training.

Every shot is captured as precise data, allowing shooters and instructors to **measure performance, adjust quickly, and improve faster**.

Measurable, Repeatable, Realistic.

Why YFX

Train at real distances
Engage targets far beyond traditional training ranges.

Measure every shot
Automatic X/Y impact data and timestamp for every shot.

Faster skill development
Immediate feedback supports rapid improvement.

Built for professional ranges
Durable system designed for demanding live-fire environments.

System Components

AccuShoot YFX combines rugged hardware and long-range wireless connectivity to enable dynamic training environments.

LFX Video Target System
High-definition projected targets and integrated shot detection.

Training Screen & Projection System
Displays dynamic targets and scenario-based training environments.

Instructor Control Station
Interface for running drills, monitoring shots, and reviewing results.

Long-Range Wireless Link
Maintains communication between the training system and instructor devices.

Protected Power & Electronics
Rugged enclosures and portable power for reliable range operation.

Designed For

- **Tactical & Sniper Teams**
  Scenario-based long-range training and after-action analysis.
- **Long-Range Competitive Shooters**
  Practice precision, timing, and shot consistency.
- **Training Academies**
  Develop long-range skills with instant feedback.
- **Ballistics Specialists**
  Collect reliable shot data for load testing and analysis.
- **Precision Hunters**
  Validate equipment and practice ethical long-distance shots.

Digitization that saves lives
