

AccuShoot DFX — Dry-Fire Experience

Professional firearms training.
Anywhere. Anytime.

Train Smarter. Measure Better. Improve Faster.

AccuShoot DFX (Dry-Fire Experience) brings the power of the AccuShoot FX ecosystem to dry-fire training, transforming every trigger press into measurable performance data.

By detecting every laser shot in real time with millimetric precision, DFX delivers instant feedback, objective scoring, and detailed performance analytics—without the need for live ammunition or a shooting range.

Whether you're a law enforcement officer, military operator, competitive shooter, firearms instructor, or responsible civilian, DFX allows you to develop and maintain critical shooting skills safely from a classroom, office, garage, or home.

Build Fundamental Skills Faster

Modern firearms performance depends on thousands of high-quality repetitions.

DFX allows shooters to practice the skills that matter most:

- Safe firearm handling
- Draw from the holster
- Presentation
- Sight alignment
- Trigger control
- Target transitions
- Tracking moving targets
- Multiple target engagements
- Reload procedures
- Decision-making under stress
- Speed and accuracy development

Every repetition is measured.

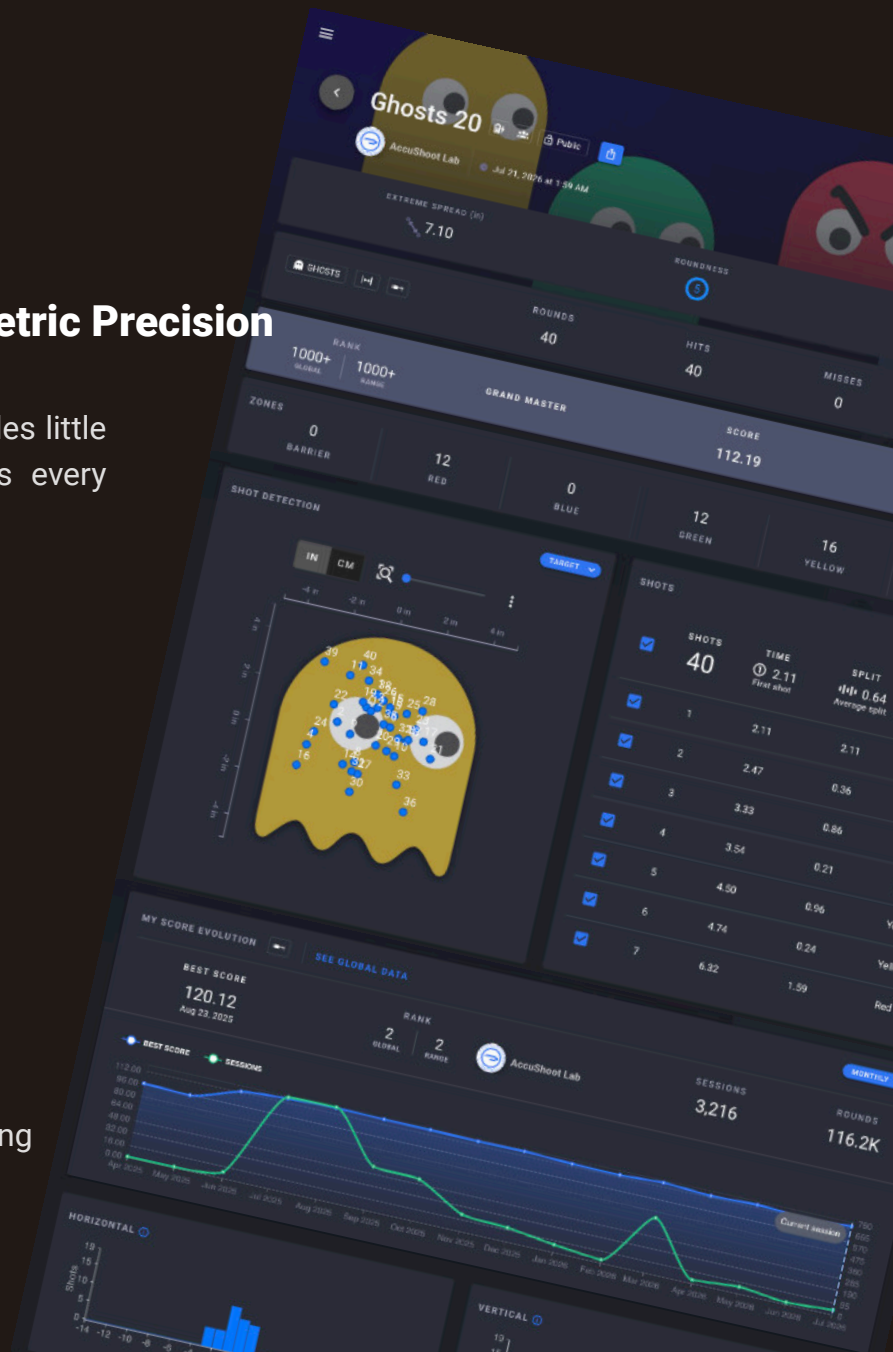

Every shot becomes actionable intelligence.

Real-Time Feedback with Millimetric Precision

Unlike traditional dry-fire practice that provides little objective feedback, DFX instantly analyzes every shot and provides:

- Shot location
- Time to first shot
- Split times
- Draw times
- Transition times
- Accuracy
- Drill scoring
- Performance history

The result is an exceptionally short learning loop that accelerates skill development.

Train Anywhere

One of the greatest advantages of DFX is freedom.

No live-fire range.

No ammunition.

No ballistic screens.

Simply set up your target and begin training almost anywhere.

Perfect for:

- ✔ Training rooms
- ✔ Classrooms
- ✔ Offices
- ✔ Home practice
- ✔ Police academies
- ✔ Military classrooms
- ✔ Ready rooms
- ✔ Competition preparation
- ✔ Instructor demonstrations

Compatible with Most Laser Training Devices

DFX works with most invisible infrared laser training systems available on the market, including:

- ✔ Laser pistols
- ✔ Laser rifles
- ✔ Laser cartridges
- ✔ Laser inserts
- ✔ Dedicated dry-fire firearms

It is also fully compatible with the AccuShoot Laser Training Device, providing a complete solution for rifles, carbines, and airsoft platforms.

Perfect Introduction to Firearms Safety

Before firing a live round, every new shooter should master safe firearm handling.

DFX provides the ideal environment to teach:

- ✔ Firearms safety
- ✔ Proper grip
- ✔ Trigger discipline
- ✔ Muzzle awareness
- ✔ Draw procedures
- ✔ Movement
- ✔ Target identification
- ✔ Decision-making

Students gain confidence before transitioning to live-fire training.

Keep Skills Sharp

Live-fire training is essential—but it isn't always available.

DFX allows operators to maintain proficiency between range sessions while dramatically reducing:

- ✔ Ammunition costs
- ✔ Range time
- ✔ Instructor workload
- ✔ Equipment wear
- ✔ Training logistics

Train every day.

Shoot live when it matters most.

Data-Driven Firearms Training

Every training session is automatically transformed into objective performance metrics.

Analyze progress over time, compare shooters, identify weaknesses, and build individualized improvement plans using measurable data instead of subjective observations.

Because what gets measured gets improved.

Key Features

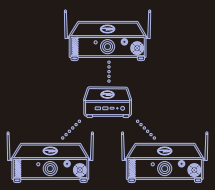

- ✔ Real-time laser shot detection
- ✔ Millimetric accuracy
- ✔ Instant scoring and feedback
- ✔ Hundreds of included drills
- ✔ Video-based scenario support
- ✔ Compatible with most IR laser training devices
- ✔ Compatible with the AccuShoot Laser Training Device
- ✔ Multi-user training through MFX
- ✔ Custom scenarios with CFX
- ✔ Private data ownership with PFX
- ✔ Comprehensive after-action review
- ✔ Performance analytics
- ✔ Portable and easy to deploy
- ✔ Suitable for beginners through elite professionals

More Than Dry Fire

DFX is part of the complete AccuShoot FX ecosystem.

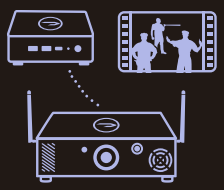

As your training requirements grow, DFX grows with you.

MFX – Multi-Fire Experience

Connect multiple DFX systems to create:

- ✔ Multi-shooter exercises
- ✔ Instructor-led classrooms
- ✔ Team competitions
- ✔ Distributed training
- ✔ Advanced synchronized drills

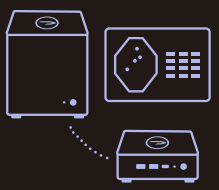

CFX – Custom-Fire Experience

Design your own:

- ✔ Interactive drills
- ✔ Video-based scenarios
- ✔ Decision-making exercises
- ✔ Qualification courses
- ✔ Agency-specific training content

No programming required.

PFX – Private-Fire Experience

Maintain complete control of your training data.

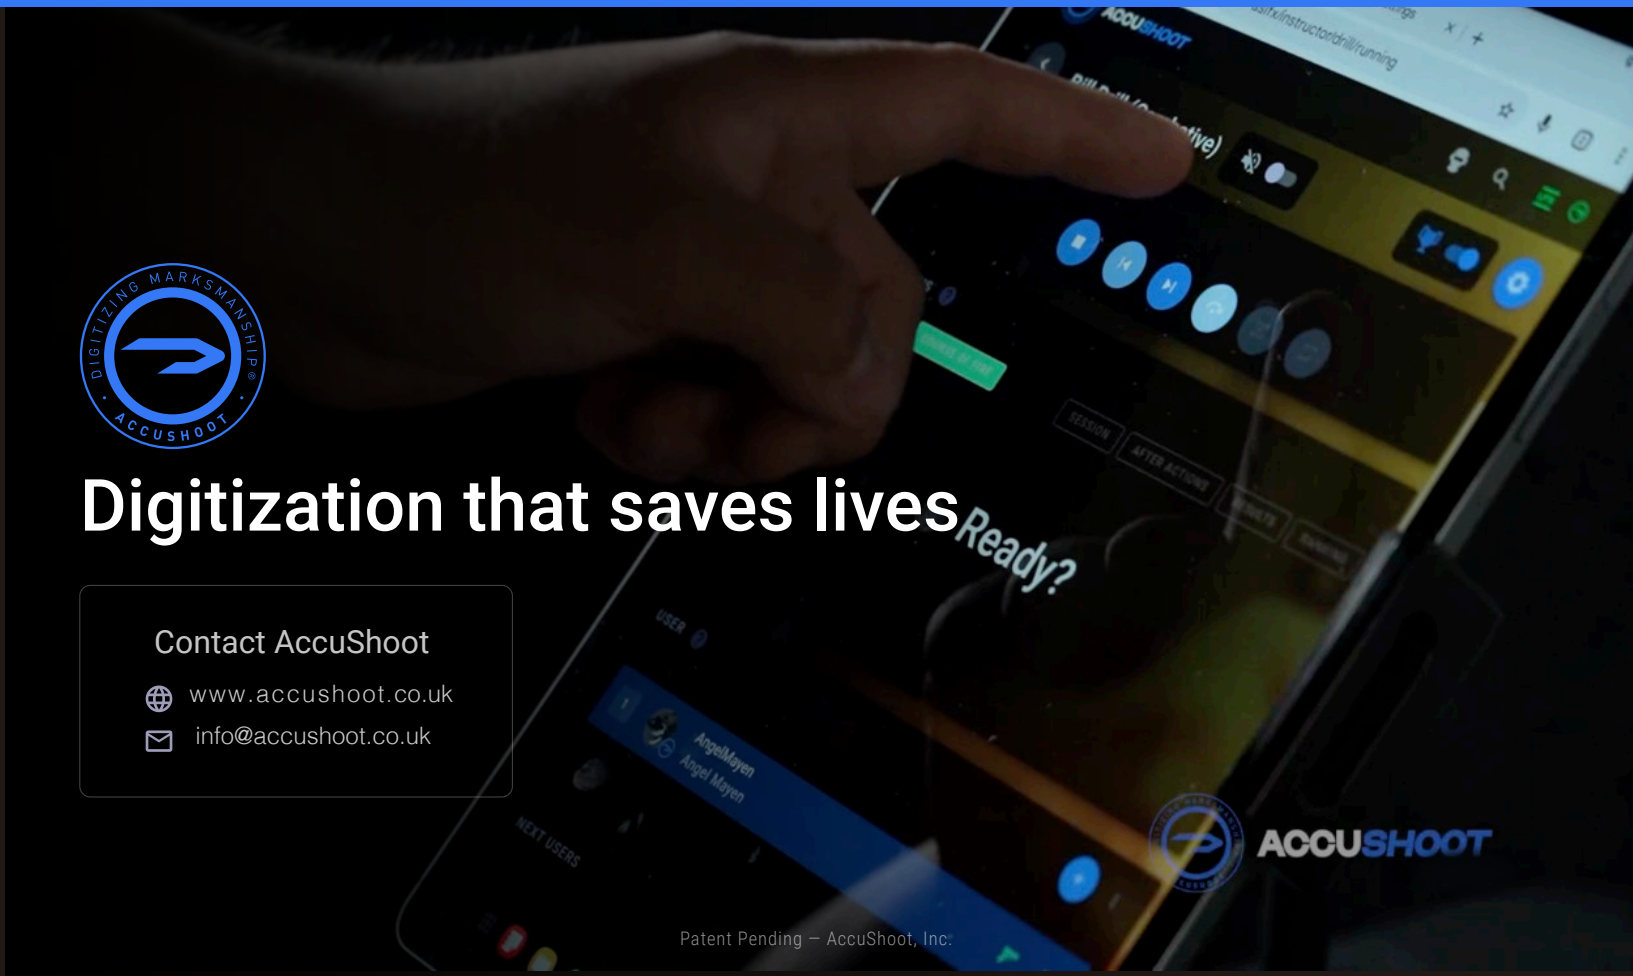

Store all performance records securely inside your own organization while managing qualifications, certifications, readiness, and long-term shooter development.

The Complete Dry-Fire Training Platform

AccuShoot DFX is more than a laser target.

It is a professional digital training platform that transforms dry-fire practice into measurable, repeatable, and data-driven performance improvement.

Whether you're introducing a new shooter to firearms safety or preparing experienced operators for demanding real-world missions, DFX delivers objective feedback that accelerates learning while reducing training costs.

Digitization that saves lives
