AccuShoot CFX — Custom Fire Experience

Easily Design Your Own Scenarios, Basic and Advanced Drills

CFX from AccuShoot lets **instructors, training organizations, police agencies, and military units** create their own drills and scenarios, sequence them into complete training programs, and deploy directly to the LFX family of products. Everything is built on a single, easy-to-use platform.

SCENARIOS | DRILLS | SEQUENTIAL | MANAGER

Four Powerful Components

1. Video-Based Scenarios

Turn real-world video into interactive training. AI tracks every person, assigns operational roles, and adjusts them dynamically — so trainees make split-second decisions in realistic, evolving encounters.

2. Custom Drills

Build target exercises from scratch. Configure up to 20 independent targets with position, movement, speed, and scoring. Preview layouts and run drills exactly as designed.

3. Sequential Drills

Combine gallery drills, custom drills, and video scenarios into structured sessions. Automate transitions to create progressive skill courses, qualification programs, or multi-phase training sequences.

4. CFX Manager

Set system-level preferences — language, time zone, units, Wi-Fi, and more — to ensure consistent operation across all locations and programs.

Key Capabilities

AI Detection & Tracking
Frame-by-frame accuracy in every scenario

Visual Drill Builder
Drag, drop, and preview target layouts and movement

Custom Targets & Themes
Match drills to any training objective

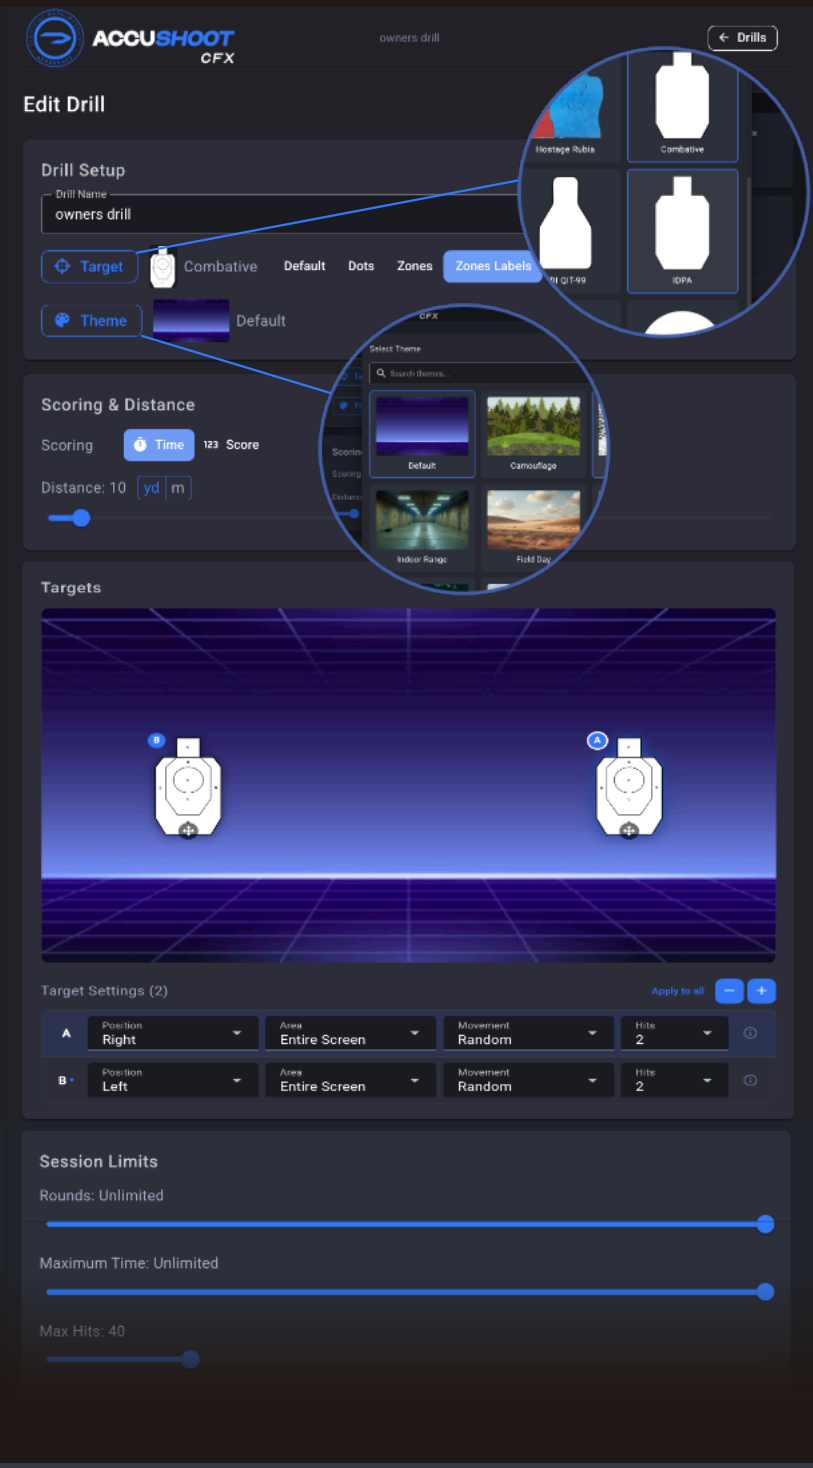

One-Click Deployment
Push drills and sequences directly to LFX instantly

Dynamic Role Assignment
Create realistic, evolving threats and interactions

Multiple Scoring Modes
Accuracy or speed-based scoring with configurable penalties

Mask Editing Tools
Pixel-level precision for perfect hit detection

Full Access Anywhere
Use CFX from any web-based browser or touchscreen device

What Ships

- **Dedicated CFX Appliance**
- Touchscreen device for recording videos and accessing CFX

All drills, scenarios, and sequences are fully compatible with the LFX family

Expand your training library with unlimited custom content, from operational scenarios to standardized qualification courses.

Digitization that saves lives
